

Iki jime

Using a specialised spike

Only a competent, responsible person who understands how to do it properly and safely should use this method.

1 Know the brain position

Use a verified European carp brain diagram to find the correct location.

2 Secure the fish

Place the carp on a stable, non-slip surface and hold it firmly.

3 Insert the spike

Quickly and firmly insert the spike into the brain at the correct angle.

4 Confirm the result

Check the fish is unconscious and does not regain consciousness.

Key points to remember

- ✓ Use a specialised iki jime spike.
- ✓ Know the correct brain position for European carp.
- ✓ Insert the spike quickly and accurately.
- ✓ Make sure the fish is unconscious and does not regain consciousness.
- ✓ Humane handling matters.
